

**The Sentricon® system puts termites
in their place — the morgue.**

Protection you can trust.

Over time, liquid treatments break down, which leaves your home vulnerable to more termite invasions. Not the Sentricon® system. Once installed, it creates a formidable ring of protection that allows foraging termites instant access to the bait. Since they prefer the bait in the Sentricon system more than wood, they eat it. When they eat it, they can't molt. When they can't molt, they die. End of colony. End of queen.

The Sentricon® system works for you, not for termites.

No digging or trenching

No structural drilling

No need to treat the soil

No scheduling hassles

SENTRICON® SYSTEM VS. LIQUID TREATMENTS

When you compare the two, there really is no comparison.

	Sentricon® System	Liquid Treatments (Termidor, Premise, Altriset)
Scientific studies documenting colony elimination	60+	< 5
Eliminate the termite queen	Routinely	Occasionally
Treatment is minimally to nondisruptive to home, lawn and landscaping	Routinely	Occasionally
Treatment effectiveness does not degrade over time	✓	
Tangible and visible evidence of protection	✓	
Notifies/informs of future termite activity	✓	
No label restrictions around water sources and wells	✓	
Treatment is removable	✓
