

**It's time to close the
all-you-can-eat buffet.**

No queen. No colony. No kidding.

Termites are good at only one thing. Eating homes.

Every year, termite meals cost homeowners more than \$5 billion. Imagine a houseguest that never leaves and eats every second of every day.

.....

The Sentricon® system and a service contract from us provides ongoing protection against termites. That means you don't have to think about it — ever.

Contact us today to restart your termite protection service, and we'll reinstall your Sentricon system and shut down the buffet. Make sure your home stays off the menu.
